

TCMS

Transport Carrier Management System

TCMS enables Asia Pacific's logistics providers to **centralise**, **visualise** and **optimise** their contracted road carriers' networks and operations.

With **TCMS**, you can plan, execute and track pickups and deliveries via your contracted carrier partners and your own assets in a single platform.

TCMS
Transport Carrier Management System

No more spreadsheets.
No more emails. No more phone calls.

Delivering Value

25% **Increase** in customer DIFOT (Delivered In Full, On Time) performance

90% **Increase** in operational team productivity

85% **Reduction** in operational manpower costs

15% **Reduction** of wasted kilometres driven

Based on average outcomes across current TCMS customers

CENTRALISE. VISUALISE. OPTIMISE.

Yojee's **Transport Carrier Management System (TCMS)** integrates with your core business systems, replacing outdated processes like emails, spreadsheets, phone calls, and text messages with one connected platform.

Built for both contracted carrier networks and owned fleets, **TCMS** gives you always-on visibility and execution tools for every driver, whether you're coordinating external carriers or dispatching your own. Track shipments, optimise routes, and streamline workflows, all from a single system that scales as you grow.

TCMS
Transport Carrier Management System

Features

TCMS gives your business real-time fleet tracking, optimised routing, and one system to manage every carrier partner, built for lower costs and fewer moving parts.

Fleet Tracking
Know exactly where your fleet is in real-time with GPS tracking

Route Planning
Plan delivery routes, assign tasks to drivers, and send customer notifications with powerful automated tools

Route Optimisation
Enhance fleet efficiency with a single click

Order Management
Consolidate all your delivery orders in one single platform

Carrier Partner Management
Connect, collaborate and execute with your carrier partners seamlessly

Electronic Proof of Delivery
Digitise your paper trails and process invoices instantly

Delivery Notifications
Keep customers updated instantly via automated email and text notifications

Driver App
Manage and communicate with your carrier drivers with an easy-to-use and free app

Reports and Insights
Improve your transport logistics performance with data-driven decisions

TAKE CONTROL OF YOUR TRANSPORT NETWORK WITH TCMS

Dispatching Orders

CENTRALISE. VISUALISE. OPTIMISE.

VALUE

Elevate operational efficiency and minimise waste
Streamline planning and control costs across your fleets and outsourced transport providers with simple, effective optimisation tools

BENEFIT

Optimise driver assignments and minimise futile commutes
Plan both your own assets and contracted partners with tailored solutions that fit your unique business needs

FEATURES

Overview of drivers' locations in relation to available tasks

- Plan and broadcast orders to your carrier partners
- Quickly plan and re-plan your fleet of drivers
- Optimise your fleet to use the least vehicles and travel the least miles

Connect, collaborate and execute with your carrier and own fleet of drivers with TCMS app

Get **Yojee TCMS** app from Apple App Store or Google Play Store.

TCMS

Download on the App Store

GET IT ON Google Play

VALUE

Stay updated at all times
Monitor your fleet and order statuses in real-time and provide customers with Proof of Delivery (POD) immediately after order fulfilment

BENEFIT

Centralised information for drivers
Keep all information in one place for your drivers, enhance traceability and performance management, and reduce paper use in your business

FEATURES

Modern and easy-to-use user interface

- Multilingual support
- POD and photo capture
- Documents flow from dispatchers to the driver (2-way)
- Driver Chat with fleet controllers
- Works with no phone signal or internet connection

Keeping Your Customers in the Loop

Delivery notifications are a direct reflection of your service. **TCMS** gives your customers visibility into their own delivery, without a single phone call to your team.

Happier customers, fewer service calls, and a delivery experience that reflects well on your business.

VALUE

Fewer calls chasing delivery status
Fewer calls asking "where's my order," more time for your team to focus on what matters

BENEFIT

Self-serve visibility for every customer
Your customers get the answer instantly, without needing to reach anyone on your team

FEATURES

Real-time updates, every step of the way

- Automated email and SMS notifications at every milestone
- Live tracking link, no app download or login required
- Real-time ETA, updated as the delivery progresses
- Digital proof of delivery, sent automatically

Beyond Reports: Build Your Own View

New in TCMS: A self-service reporting layer. Managers build their own dashboard tabs, no export to Excel, no separate BI tool required.

VALUE

See exactly what your role needs, nothing else
Stop digging through generic reports for the one number that matters to you

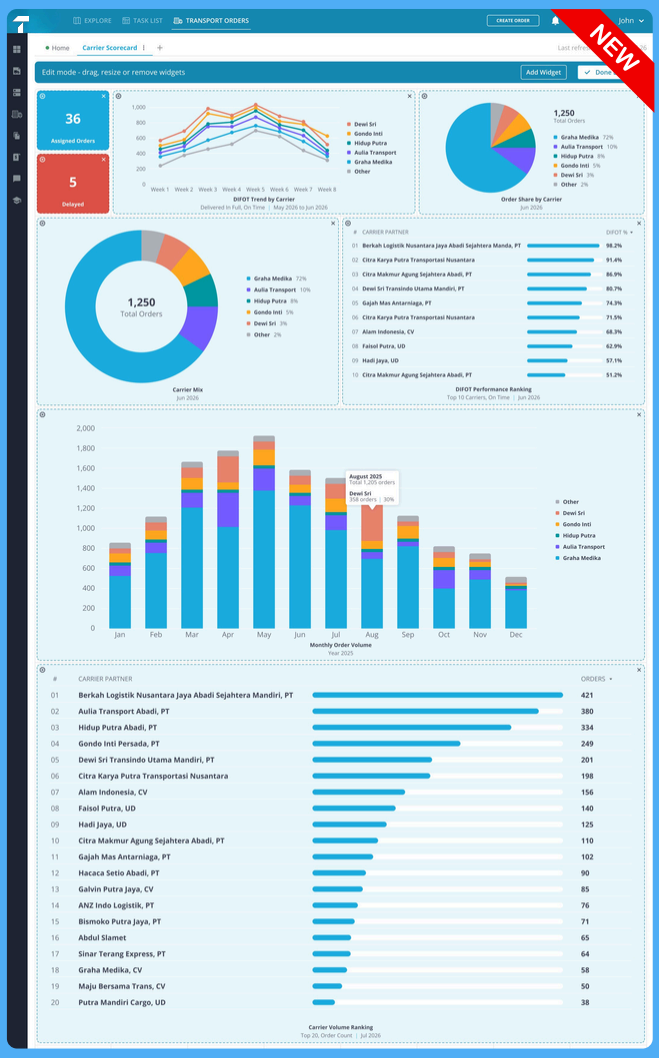

BENEFIT

Every manager gets their own view, saved and ready
Name, arrange, and resize your own tabs; layouts persist between sessions

FEATURES

Metrics, viewed your way

- 5 core metrics: Orders, Delivered, Open, Cancelled, DIFOT %
- Data viewed by date, status, business unit, carrier, service type, mode, driver, destination
- Stacked bar, line, pie/donut, ranked table, and KPI tiles

Enhanced Dashboards are currently in the final stage of development. Screens shown are illustrative mock-ups and subject to change.

What's Next: We're continuing to expand **TCMS** with live visual tracking, performance trend indicators, capacity and contract alerts, and expanded integration options.

Built to Scale, Wherever You Operate

TCMS runs for businesses managing 200 to 35,000+ shipments a month, and growing. Whether you run your own fleet, work with contracted carrier partners, or both, **TCMS** adapts to your operation, with configurable settings by transport company or project, whether that means capturing weighbridge data for one job type or photo proof of cargo for another.

Currently operating across Australia, New Zealand, Singapore, Malaysia, Indonesia, South Africa, with China on the roadmap as we continue to expand.
